

MULTITAPE®

For a number of years Rawdon Smith Associates, Inc., has been producing instrumentation and tape duplicating equipment recognized to be of exceptional quality. The vigorous standards and progressive design techniques applicable to this type of equipment have been incorporated in the production of our new MULTITAPE® reel-to-cassette duplicator (cassette-to-cassette as a modification).

Our use of a common capstan drive results in duplicate tapes of a caliber heretofore available only in commercially produced cassettes using out-of-cassette recording techniques. This unique design makes possible the elimination of problems (maintenance, timing, etc.) which are inherent with independently driven master and duplicate channels.

Write today for details and specifications on this exceptional, money-saving equipment.

Manufactured and sold exclusively by
RAWDON SMITH ASSOCIATES, INC.,
1735 - 20th St., N.W., Washington, D. C. 20009

Pushbutton Electronic
LEARNING · INFORMATION · RESEARCH

ERS-300

Electronic Retrieval System

"The latest state of the art" in educational technology for learning resource centers, language labs, research. High-speed pushbutton access from many student positions to unlimited number of remote multi-media program sources.

- EXTREMELY ADAPTABLE
- UNLIMITED EXPANSION
- ELECTRONIC SPEED, RELIABILITY
- 50 to 1,000-plus DIAL POSITIONS

May we assist you in planning your future system?

Write, or call, for detailed information.

RHEEM CALIFONE DIAL ACCESS RETRIEVAL SYSTEM

The Only System With Solid State Switching... years ahead in technology... leading the field in the state of the art.

- No moving parts to wear
- Low maintenance time
- No mechanical parts to service
- Completely automatic superior quality tape transports
- Instant program retrieval — no waiting or busy signal

Tailored to fit any physical or academic requirements.

Call us collect at (213) 870-9631 (Mr. Ross)
or write for full information to:

New headset with wireless boom passes all tests

The new Telex 2400 headset hangs in there even through almost inhuman tests for ruggedness and fidelity. ■ The new wireless boom rotates 360°. It's the nuts for teaching labs. Fully adjustable. Puts the microphone close to the lips to take full advantage of the noise cancelling characteristics of the dynamic microphone. Insures "original voice" clarity. And you hear it like it is, with soft, comfortable ear cushions with a special acoustic seal. ■ Rugged, it has reinforced construction to withstand heavy classroom use and all student monkeyshines. ■ Want the whole wild story? You know how it is with something that's really well designed

You look at it, and you know
straight away that it will do its
job efficiently.

You know that it looks right
because it is right.

Apply that principle
to learning laboratories
and what are you left with?

**Would you
gamble
this man's
mission on
"low bid"
equipment?**

Obviously not!

Quality, reliability, fail-safe dependability . . . these are not inexpensive. Imagine, if you will, the consequences of a space mission executed with electronic gear purchased on a "low-bidder" basis. Unthinkable!

In modern education too, the need for reliability and quality in electronic equipment is obvious. This is precisely why Tandberg electronic teaching systems are demanded by knowledgeable educators. For nothing has been spared to make Tandberg the standard of excellence.

Maintenance and service of Tandberg equipment is easy, uncomplicated — all due to quality manufacture. Consequently, the "better, clearer, more natural sound" of Tandberg becomes an important tool for education everywhere.
