

# Just drop it in your language lab and congratulate yourself...

Also, Telex  
language lab headsets  
are available for use  
with this system  
as well as direct  
replacement in most  
other lab systems.

## You've updated to cassette.

It's that simple.

A Telex Language Lab drop-in cassette recorder/player is designed to update open reel systems to cassette format. And because it has its own individual controls, it can be dropped right in without changes to your control console.

The same design as standard Telex cassette machines is incorporated (including one button record and instant review), with special modifications for interfacing with most existing systems.

With this two channel unit, the student can record for listen, respond and compare learning.

And the instructor can record on the master channel at any or all student positions, thereby having the flexibility of preparing or duplicating special programs, and separating the class into different study sections by use of multiple programs.

All this, merely by dropping in a cassette. For complete information on the Telex Language Lab drop-in cassette recorder/player, write

**no need to tie-up  
special room for  
language teaching!**

Wireless MONI-COM II\*  
is mobile — goes anywhere in school.  
Does everything a wired lab does,  
except tie-up a room!

Exclusive, patented MONI-COM\* feature permits  
teacher to monitor each student, without his knowledge  
— or talk to any one student — ALL FROM THE CONSOLE!

CONSOLE is compact, uncomplicated. Broadcasts up to 6 different lessons  
at one time. Size; 26" x 18" x 8".

STUDENT RECEIVER/HEADSET is *all one unit*. 6-channel wireless, no  
exposed wires. Unit turns-off, automatically, when console is turned-off. No  
danger of students leaving receivers on.

P/H also manufactures wireless 6 and 12-channel systems for stenographic  
laboratories and instructional media centers.

Write for literature or dramatic, no-obligation demonstration in your school.

\*The learning system that encourages freedom of speech

# A Wireless Language Laboratory for 30 students only \$2,000 complete

HERE IS YOUR COMPLETE LABORATORY  
EVERYTHING IS IN THE HEADSET

- No installation
- No console
- No transmitter
- Nothing on the students' desks
- Nothing on the floor

You can build this wireless Language Laboratory with one headset at a time. For as little as \$640, you can have a 10-station laboratory; \$40 for the loop and \$60 for each headset.

### How Does It Work?

It is called induction. When you plug the loop into your tape recorder, your room is wired for sound. The sound is transmitted through the loop. The headset contains a wire coil antenna, and an amplifier; to pick-up the sound, and to make it audible.

## We threw out the consoles and put everything in the headset.

Why tie up a \$30,000 classroom when you can put everything in the headset? The DDC wireless headset gives the language student listen/respond/compare and 2-way teacher monitoring. Cost \$60. You paste a \$40 loop around the wall of your classroom, plug it into your own tape recorder and you have wireless language learning. No other equipment is needed. You can outfit a full class of 30 students for less than \$2,000. Send for 20-page illustrated booklet.

FOR FURTHER INFORMATION  
OR DEMONSTRATION

Dictation Disc Company  
240 Madison Ave.  
New York, N.Y. 10016

- Please send further information on the DDC Wireless Headset
- Please call for demonstration.
