Sony's Multi Disc Player

Sony recently introduced a new videodisc player, the MDP-1700AR Multi Disc Player. It offers an auto reverse (AR) fea-

ture, which allows users to move quickly to any point on either side of a disc. Capable of playing either 8- or 12-inch videodiscs and either 3- or 5-inch audio compact discs, it works interactively with computers and can be connected to any television set. A barcode reader included with this player permits easy, single-swipe access to any chapter or video clip.

Less Commonly Taught Languages

Dorry M. Kenyon, from the Center for Applied Linguistics, recently advised subscribers to the LLTI to look into an ERIC document entitled "A Survey of Materials Development Needs in the Less Commonly Taught Languages" (ED 366

203). The work is put out by the National Foreign Language Resource Center at Georgetown University/Center for Applied Linguistics. He recommends using the microfiche copy, which holds 740 pages and covers 82 languages. The "Survey" evaluates textbooks, audiotapes, videotapes, and computer courseware in use at the beginning, intermediate and advanced levels of instruction at the country's National Foreign Language Resource Centers.

Language Labs on the Leading Edge

Theme of the conference:

Advancements in electronic technologies have placed many language labs at the forefront of the technological revolution in education. Computers, digital media, and satellite communications are now commonplace in many labs around the world. New labs and renovated labs often include many or all of these technologies, and at many institutions it is the lab directors who are the most knowledgeable about them. Often it is lab directors who are the keepers of technological memories; who, while constantly informing themselves of advancements, at the same time maintain an experience file of the good and the not-so-good of years past. The goal of IALL '95 at Notre Dame is to share that experience, provide information about the latest technologies along with an opportunity to develop familiarity with them, to provide opportunities for professional growth, and to continue to assess and evaluate the role of technology in the language learning process.

Founded in 1842, the University of Notre Dame has a rich traditional heritage. The campus, located on a scenic 1250 acres on the north side of South Bend, Indiana, is home to about 10,000 undergraduate and graduate students from all over the United States and some 72 foreign countries.

Right next to Knute Rockne football stadium is perhaps the most technologically advanced classroom building in the United States, DeBartolo Hall. Its 84 classrooms are all connected to Media-On-Call, a centralized media distribution network for images, sound and data. Over the Internet and via satellite, the world can be

brought into meeting rooms that vary in size from 20-seat seminar rooms to a 450-seat auditorium. Uplink capability makes worldwide broadcast of some IALL '95 proceedings a possibility to consider. Make plans now to attend for sure, perhaps to present, at IALL '95 at Notre Dame.

Put it on your calendar. Pre-conference workshops in video editing, computer applications, instructional design, lab design and management begin May 23 and 24; conference sessions begin May 25 and finish May 27 in the afternoon. Board and council meetings are scheduled on May 28. The call for proposals will appear in September 1994.

IALL '95 at Notre Dame is for you if you are:

- ❖ managing a language lab, learning lab, or media lab...
- ❖ interested in the role of the language lab...
- ❖ planning a new lab or renovating an old one...

- ❖ interested in the role of technology in teaching and learning...

Exhibits PLUS! IALL '95 at Notre Dame will feature:

- ❖ Language Lab Equipment, Hardware, Software
- ❖ Integrated courseware (textbooks and media)

Perennial conference favorites:

- ❖ Teaching Languages with Technology: What's new?
- ❖ Language Labs Around the World
- ❖ Designing new labs and renovating older labs
- ❖ Managing people, resources and money
- ❖ Getting money: •budgets •grants
- ❖ Pre-conference workshops: •computer applications •video editing •multi-media •networks •and more
- ❖ Keeping it legal: copyright issues
