

CÉSAR L. BARRIO AMOROS

Top predators in the Venezuelan Llanos are increasingly threatened, emphasizing the need to conserve remaining populations of Green Anacondas (*Eunectes murinus*). See article on p. 92.

BRYAN HAMILTON

Annual surveys are attempting to shed light on the natural history and conservation status of Sonoran Mountain Kingsnakes (*Lampropeltis pyromelana*) in the Great Basin. See article on p. 86.
