

Table 14. Details on deaths and exposure related fatalities in 2020.

County	Caller Site	Exposure Site	Age, Years	Gender	Level Of Healthcare Facility Care	Reason	Route	Clinical Effect	Substance	Blood Concentration @ Unknown Time Unless Specified
Shawnee	Healthcare facility	Own residence	64	Male	Admitted to critical care unit	Intentional suspected suicide	Ingestion	Asystole (Unrelated) Dysrhythmia (other/N.O.S.) (Unrelated) ECG change - QTc prolongation (Related) Hypertension (Related) Hypotension (Related) Pulseless Electrical Activity (Unrelated) Tachycardia (Related) Agitation (Related) CNS Depression (Major) (Related)  Confusion (Related) Hallucinations/delusions (Unrelated) Other - Ocular (Related) Dyspnea (Related) Hyperventilation/tachypnea (Unrelated) Pulmonary edema (Unrelated) Respiratory arrest (Unrelated)	Clozapine Cyclobenzaprine Citalopram	Norclazapine 1100 ng/mL Clozapine 3400 ng/mL Cyclobenzaprine 47 ng/mL
Sedgwick	Healthcare facility	Own residence	37	Female	Admitted to critical care unit	Intentional suspected suicide	Ingestion	Hypotension (Related) Tachycardia (Related) Acidosis (Related) CNS Depression (Major) (Related) Hypoxic brain injury (Related) Intracranial bleed (Related) Other - Neurological (Related) Pupil(s) nonreactive (Related) Respiratory depression (Related)	Quetiapine topiramate	None
Sedgwick	Healthcare facility	Own residence	67	Female	Admitted to critical care unit	Unintentional misuse. Had ran out of Percocet and had been taking 8 G of Tylenol 500 mg daily for the past 4 days.	Ingestion	Hypotension (Related) Tachycardia (Related) Abdominal Pain (Related) Constipation (Unrelated) AST, ALT>100<=1,000 (Related) Bilirubin increased (Related) Acidosis (Related) Creatinine increased (Related) Other - Renal/GU (Related) Dyspnea (Related) Hyperventilation/tachypnea (Related) Respiratory arrest (Related) Respiratory depression (Related) X-ray findings (+) (Related)	Acetaminophen Aspirin	Acetaminophen 46 mcg/mL @ Chronic Salicylate 2.8 mg/dL @ 6 h
Sumner	Healthcare facility	Public area	25	Male	Admitted to non-critical care	Intentional suspected suicide	Ingestion	Asystole (Related) Bradycardia (Related) Hypertension (Related) Tachycardia (Unknown if related) CNS Depression (Moderate)(Related)	Zolpidem Alprazolam Ethanol Gabapentin Gabapentin Sertraline Sertraline	ETOH < 5 1st lab draw Results from autopsy: Zolpidem 208 ng/ml Alprazolam 74 ng/mL Gabapentin 1.3 mg/L Gabapentin 1.6 mg/L Sertraline 0.4 mg/L Sertraline 0.63 mg/L

County	Caller Site	Exposure Site	Age, Years	Gender	Level Of Healthcare Facility Care	Reason	Route	Clinical Effect	Substance	Blood Concentration @ Unknown Time Unless Specified
Johnson	Healthcare facility	Own residence	42	Female	Admitted to critical care unit	Intentional suspected suicide	Ingestion	V. tachycardia/V. fibrillation (Related) ECG change - QRS prolongation (Related) Hypotension (Related) Tachycardia (Related) Electrolyte abnormality (Related) Hypothermia (Unknown if related) Agitation (Related) Confusion (Related) Seizures (status) (Related) X-ray findings (+) (Unknown if related)	Dextromethorphan Guafenesin Caffeine	Dextroprphan/Levorphanol 400 ng/mL Dextroprphan/Levorphanol Methorphan 830 ng/mL Guafenesin 10 mcg/mL
Finney	Patient was referred to healthcare facility by primary care physician	Workplace	Unknown	Male	Admitted to non-critical care	Unintentional occupational	Dermal Ingestion	Low hemoglobin/hematocrit (Unknown if related) Other - Miscellaneous (Unknown if related)	RoundUp 365 Glyphosate	None
Pratt	Healthcare facility	Own residence	32	Female	Admitted to non-critical care	Intentional suspected suicide	Ingestion	Asystole (Related) Bradycardia (Related) ECG change-QRS prolongation AST, ALT>100<=1000 (Related) Acidosis (Related) CNS Depression (Major)(Related) Mydriasis (Related) Pupils nonreactive (Related) Respiratory Arrest (Related)	Diphenhydramine	None
Saline	Own residence	Own residence	55	Male	Admitted to critical care	Unintentional General. Patient confused or mentally incompetent	Ingestion	Hypertension (Unrelated) Hypotension (Related) Tachycardia (Related) Nausea (Related) Vomiting (Related) Respiratory arrest (Related) Respiratory depression (Related)	Mr. Clean Lemon All Purpose Clean Alkali/Anionic/ Nonionic	None
Shawnee	Healthcare facility	Unknown	37	Male	Admitted to critical care	Intentional abuse	Ingestion/ Unknown	ECG change - QTc prolongation (Unknown if related) Hypertension (Related) Other Cardiovascular (Unknown if related) Tachycardia (Related) Troponin elevation (Unrelated) Other - Heme/Hepatic (Unrelated) Electrolyte abnormality (Unrelated) Fever/hyperthermia (Unrelated) Rhabdomyolysis (Unrelated) Agitation (Related) CNS Depression (Major) (Unrelated) Confusion (Related) CVA (Unrelated) Creatinine increased (Unrelated) Dyspnea (Unrelated) Hyperventilation/tachypnea (Unrelated) X-ray findings (+) (Unrelated)	Methamphetamine Heroin	None
Sedgwick	Healthcare facility	Unknown	44	Male	Admitted to critical care	Unknown-homeless and found down	Unknown	Bradycardia (Related) Hypotension (Related) Other Cardiovascular (Related) Pulseless Electrical Activity (Related)	Unknown drug Olanzapine	None

County	Caller Site	Exposure Site	Age, Years	Gender	Level Of Healthcare Facility Care	Reason	Route	Clinical Effect	Substance	Blood Concentration @ Unknown Time Unless Specified
								Acidosis (Related) CNS Depression (Major) (Related) Creatinine increased (Related) Respiratory arrest (Related)		
Wyandotte	Healthcare facility	Own residence	30	Female	Admitted to critical care	Intentional suspected suicide	Ingestion	Bradycardia (Related) Dysrhythmia (other/N.O.S.) (Related) Hypotension (Related) Other Cardiovascular (Related) AST, ALT>100<=1,000 (Related) Low hemoglobin/hematocrit (Unknown if related) Acidosis (Related) Electrolyte abnormality (Related) Hyperglycemia (Related) Hypothermia (Related) Other - Miscellaneous (Related) Rhabdomyolysis (Related) Seizures (multi/discrete) (Related) Miosis (Related) Other - Ocular (Related) Creatinine increased (Related) Oliguria/anuria (Related) Respiratory arrest (Related) Respiratory depression (Related) X-ray findings (+) (Related)	Metoprolol Amlodipine Hydroxyzine Fluoxetine Acamprosate Methamphetamine	At autopsy: Hydroxyzine 1100 ng/ml Norfluoxetine 180 ng/ml Fluoxetine 350 ng/ml Methamphetamine 110 ng/ml
Johnson	Healthcare facility	Own residence	54	Female	Admitted to critical care unit	Intentional suspected suicide	Ingestion	Asystole (Related) Bradycardia (Related) ECG change - QRS prolongation (Related) ECG change - QTc prolongation (Related) Hypotension (Related) Pulseless Electrical Activity (Related) Tachycardia (Related) AST, ALT>100<=1,000 (Related) Acidosis (Related) Electrolyte abnormality (Related) Rhabdomyolysis (Related) CNS Depression (Major) (Related) Seizure (single) (Related) Creatinine increased (Related) Oliguria/anuria (Related)	Citalopram Alcoholic beverage Bupropion Venlafaxine	Citalopram 1184 Ng/ML Ethanol 365 Mg/Dl Bupropion 637 Ng/ML
Cloud	Healthcare facility	Own residence	51	Male	Admitted to non-critical care	Unintentional Misuse. Patient set off two bug bombs (unknown brand) and stayed in the home during the release of the product.	Inhalation	Asystole (Unknown if related) Hypotension (Unknown if related) Mydriasis (Unknown if related) Pupil(s) nonreactive (Unknown if related) Dyspnea (Unknown if related) Respiratory arrest (Unknown if related) Respiratory depression (Unknown if related)	Unknown pesticide bug bomb	None
Johnson	Healthcare facility	Own residence	95	Male	Admitted to critical care unit	Intentional suspected suicide	Aspiration (with ingestion) Ingestion	Asystole (Related) Hypotension (Related) Acidosis (Related) Hypothermia (Related) Confusion (Related) Hallucinations/delusions (Unknown if related)	Amlodipine Tamsulosin Protonix Atorvastatin	None

County	Caller Site	Exposure Site	Age, Years	Gender	Level Of Healthcare Facility Care	Reason	Route	Clinical Effect	Substance	Blood Concentration @ Unknown Time Unless Specified
								Creatinine increased (Related) Hematuria (Related) Oliguria/anuria (Related) Hyperventilation/tachypnea (Related) Respiratory arrest (Related) Respiratory depression (Related)		
Wyandotte	Healthcare facility	Unknown	13	Female	Admitted to critical care unit	Unknown reason, suspected suicide	Unknown	Asystole (Related) V. tachycardia/V. fibrillation (Related) Hypotension (Related) Pulseless Electrical Activity (Related) Tachycardia (Related) Troponin elevation (Related) Pallor (Related) AST, ALT>100<=1,000 (Related) Acidosis (Related) Anion gap increased (Related) Electrolyte abnormality (Unknown if related) Hyperglycemia (Unknown if related) CNS Depression (Major) (Related) Seizure (single) (Related) Mydriasis (Related) Pupil(s) nonreactive (Related) Creatinine increased (Related) Hematuria (Unknown if related) Oliguria/anuria (Related) Renal failure (Related) Pulmonary edema (Related) Respiratory arrest (Related) X-ray findings (+) (Unknown if related)	Bupropion Vyvanse Escitalopram Aripiprazole	@ unknown time Hydroxybupropion 1400 ng/mL Bupropion 5100 pg/mL Amphetamine 250 ng/mL Escitalopram 160 ng/mL Aripiprazole 60 ng/mL
	Healthcare facility	Own residence	69	Female	Admitted to critical care	Unintentional misuse Sprayed fogger in her face, she was able to call family. Found down by EMS	Inhalation/ Nasal	Hypertension (Unknown if related) Acidosis (Unknown if related) CNS Depression (Major) (Unknown if related) Intracranial bleed (Unknown if related) Mydriasis (Unknown if related) Pupil(s) nonreactive (Unknown if related) Respiratory arrest (Unknown if related)	Hot Shot Flea Fogger Tralomethrin	None
Sedgwick	Healthcare facility	Own residence	35	Male	Admitted to critical care	Intentional abuse	Ingestion Inhalation	Hypertension (Related) Tachycardia (Related) Other - Heme/Hepatic (Unrelated) Acidosis (Related) Excess secretions (Related) Fever/hyperthermia (Related) Other - Miscellaneous (Related) Agitation (Related) CNS Depression (Major) (Related) Hypoxic brain injury (Related) Myoclonus (Related) Other - Neurological (Related) Seizures (multi/discrete) (Related) Tremor (Related) Miosis (Related) Other - Ocular (Related) Creatinine increased (Unknown if related) Cough/choke (Related)	Alprazolam WD-40 Aerosol Oxycodone	None

County	Caller Site	Exposure Site	Age, Years	Gender	Level Of Healthcare Facility Care	Reason	Route	Clinical Effect	Substance	Blood Concentration @ Unknown Time Unless Specified
								Dyspnea (Related) Hyperventilation/tachypnea (Related) Other - Respiratory (Related) Respiratory arrest (Related) Respiratory depression (Related)		
Wyandotte	Healthcare facility	Own residence	20	Female	Admitted to critical care unit	Unintentional therapeutic error. Mentally delayed. Receiving supratherapeutic doses of acetaminophen chronically.	Ingestion	Hypotension (Related) Tachycardia (Related) Ammonia elevation (Related) AST, ALT>1,000 (Related) Bilirubin increased (Related) Coagulopathy - other (Related) PT/INR prolonged (Related) Acidosis (Related) Anion gap increased (Related) Electrolyte abnormality (Related) Hypoglycemia (Related) Hypothermia (Related) CNS Depression (Major) (Related) Pupil(s) nonreactive (Related) Creatinine increased (Related) Respiratory arrest (Related)	Acetaminophen	Acetaminophen 131 mcg/ml Chronic ingestion
